Exceptional Antique Garniture of Large Delft Covered Vases

£8,900

An exceptional garniture of unusually large delft or faience pottery vases and covers, consisting of three baluster shaped vases and two sleeve or trumpet shaped vases, each with a faceted, ribbed, body and domed cover with lion finial decorated all over with exotic scenes of birds and flowers in a bright cashmere palette in imitation of oriental porcelain. A particularly unusual feature is the decoration to the underside of the lids on the baluster vases, meaning that the garniture is equally attractive viewed from below, such as atop a bookcase or tall cabinet, for example, as it is when placed on a table.
